EDUCATION

BINUS University **Sep 2022 – Feb 2026**
Alam Sutera, Tangerang, Indonesia

Bachelor of Computer Science **(GPA: 3.85/4.00)**
Relevant Coursework: Data Structures & Algorithms, Object Oriented Programming, Software Engineering, Databases, Machine Learning

WORK EXPERIENCE

Backend Engineer **Apr 2026 – Dec 2026**
PT. Bank Negara Indonesia (Persero) Tbk. Central Jakarta, Indonesia

- Engineered and enhanced business-critical backend services and REST APIs for a housing subsidy platform (2,000+ branches, 15+ roles), integrating with Tapera, a government service, using **C#, .NET, Dapper, and SQL Server**.
- Optimized SQL queries and stored procedures behind report generation, cutting load time from several minutes to ~0–5 seconds (**~97–99%**) and resolving recurring production timeouts.
- Owned production incident investigation as **Developer on Duty**, tracing data inconsistencies and service failures across application logic, SQL queries, stored procedures and system integrations.
- Built **database-backed logging** for Tapera integration calls, replacing dependency on other teams for logs and speeding up production troubleshooting.
- Integrated **SonarQube** and remediated **10+ SAST/DAST** findings to strengthen application security and code quality across .NET Framework applications.

Application Developer Intern **Mar 2025 – Mar 2026**
Asuransi Astra Buana South Jakarta, Indonesia

- Built responsive UIs for an internal employee super app (reimbursement, approvals, service requests) used by **1,500+ employees** at Asuransi Astra Buana, using React, Redux, and Tailwind CSS.
- Owned end-to-end development of reimbursement, office car, and snack meeting request modules, integrating multi-step forms and approval workflows with the **RIANG OPEX** finance service.
- Built a queue management system for insurance branch offices **from scratch**, replacing a fully manual process and reducing frontliner idle time by **87.5%**, with real-time dashboards and TV displays using React, Redux, and Material UI.
- Engineered **5+ C# (ASP.NET) APIs** for customer check-in, walk-in services, and frontliner status tracking, and deployed the system with a micro-frontend architecture on nginx.
- Integrated **Multi-Factor Authentication** with Microsoft Identity and Azure for a secure login flow.

PROJECTS

Offerly | *Go, Gin, PostgreSQL, Redis, Kafka, Docker* **Sep 2026 – Present**

- Developing a backend application using Go (Gin) and PostgreSQL, focusing on RESTful API design, job application management, and relational database modeling.
- Building a modular backend architecture with plans to integrate Redis, RabbitMQ, and cloud object storage to support caching, asynchronous processing, and file management.

TECHNICAL SKILLS

Languages | C#, Go, Python, Typescript, Javascript, Java
Frameworks | React, ASP.NET, Gin, Springboot
Developer Tools | Git, Postman, Docker, Jenkins, Visual Studio, Visual Studio Code, Jira
Databases | SQL Server, PostgreSQL, MongoDB
Libraries | Redux, Tailwind CSS, Material UI
